Hyperbaric Oxygen Therapy for **brain care**

Our mission as a company is to facilitate the necessary brain care support – in the development of hyperbaric chamber technology that can improve the quality of life and help people integrate this technology into their lives to get back on track.

**Making
Hyperbaric
oxygen
Therapy
(HBOT)
technology
accessible to
optimize**

brain performance

We know the brain is a complex and dynamic organ with the inherent ability to improve its performance while growing older or to regain its healthy functioning after head trauma.

Hyperbaric oxygen therapy has gained ground as a complementary treatment to bring relief to people affected by various forms of head trauma or cognitive decline, people which need to sustain accessible and long-term mHBOT brain care sessions in the comfort of their homes.

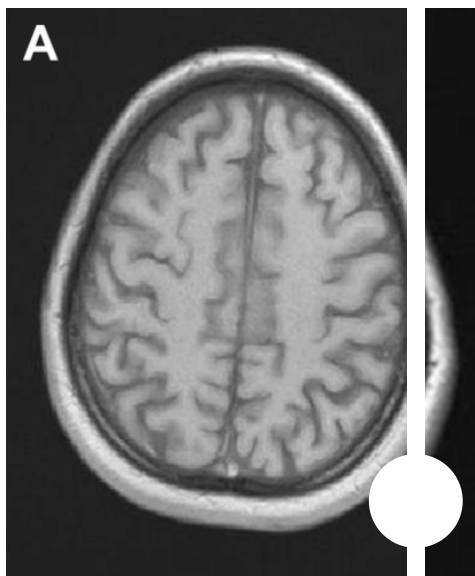

Healing with Hyperbaric Oxygen Therapy (HBOT) after traumatic brain injury

We read stories about people's problems on a daily basis, people with their lives turned upside down by some misfortunate [head accident and traumatic brain injury \(TBI\)](#).

Reading about someone else's head injury, concussion or PTSD might not hurt that much, we cannot even imagine the pain they're going through or the difficulties regarding their recovery. We can only show them our understanding and support.

The number one reason we're working in this industry is that we've seen what HBOT chambers can do to improve the lives of numerous people with serious head concussions and traumatic brain injuries, people with cognitive decline due to psychological conditions or due to old age.

**Mind your head.
Your brain will
thank you.**

HBOT is documented to:

- ✓ Increase oxygen saturation to the brain
- ✓ Reduce cerebral edema and neuroinflammation
- ✓ Grow new blood vessels (Angiogenesis)
- ✓ Increase stem cell production (of brain cells)
- ✓ Repair gray matter (which contains nerve cell bodies)
- ✓ Repair white matter (which are the filaments that connect cell bodies and carry messages between nerve cells)
- ✓ Reach all oxygen-deficient areas of the brain to reactivate neurons
- ✓ Stimulate the immune system

**Oxynova®
mild
hyperbaric
oxygen
chambers
(mHBOT)
facilitate
recovery in
wellness &
holistic care
centers.**

Oxygen supplementation with Mild HBOT can work with effective results as part of a system of therapies. Given its low number of contraindications, risks, and side effects, it may be one of the safest therapies to use, within the correct protocols.

**We build Hyperbaric Oxygen
Therapy (HBO) technology to
improve the quality of life**

Mild HBOT Hyperbaric Oxygen Therapy is one of the safest and effective therapeutic procedures available today.
